 Inspire Health Endocrinology

Inspired doctors. Inspired outcomes.

Inspire Health Medical Group is the largest, independent multi-specialty physician group in the Central Valley. We take pride in increasing patient access to our physicians through Inspire Health Medical Group practice sites. With 10 locations in the Fresno/Clovis area, these offices offer 35+ medical specialties and subspecialties from internal medicine and vascular surgery to psychiatry and orthopaedic oncology.

Specialized medicine inspired by you.

Our doctors have always been inspired to not only practice here but to teach the next wave of medical professionals at the highest academic levels. And to pioneer cutting-edge research for treating Valley patients with new advancements in technology and medical discovery.

We offer Central Valley patients access to more than 85 specialties and subspecialties through our group of more than 300 physicians and nearly 100 advanced practice providers. Our partnerships with more than 50 healthcare facilities allow Inspire Health providers to see over 500,000 patients every year, providing the care they need close to home.

Our patients and community have inspired us to address the unique healthcare needs of the Central Valley. In turn, we have inspired the next generation of healthcare leaders by teaching at the highest academic levels and conducting cutting-edge research, giving our communities access to innovative and inspired healthcare. Since our founding in 1979, we have diligently worked to expand our group of physicians to encompass a variety of medical specialties.

Inspiring top physician specialists to put down roots here is why Central California Faculty Medical Group and its University Centers of Excellence are now **Inspire Health Medical Group**. Because, when the best minds in medicine come together, the result is nothing short of inspirational.

Leigh Ann O'Banion, MD
Vascular Surgery

Randall Stern, MD
Vascular Surgery

Inspire Health Referral Information

Office 559.320.1090

Referral Fax 833.973.6199

Services

- **Adolescent/pediatric dermatology**
(newborn to 18-years-old)

- **General dermatology**

- **Photodynamic therapy**

This treatment combines drug therapy with light energy to treat diseases in a targeted way. The patient first takes a drug called a photosensitizer. Then the physician uses a laser, or similar device, to apply a specific wavelength of light energy, which activates the drug in the desired location. Photodynamic therapy can be used to treat various diseases, including cancer, acne, and some bacterial, fungal, and viral infections.

- **Phototherapy**

Phototherapy or light therapy involves exposing the skin to ultraviolet light on a regular basis to help treat skin problems like psoriasis and eczema. Inspire Health Dermatology provides medical supervision for phototherapy or works with patients to complete the therapy at home using a portable phototherapy unit.
